Mega Projects from Lighting-Plus

Comprehensive Literature and Spec Sheets

Full literature, specification sheets and line drawings available to aid easy specifications

Geographic Information System:

Lighting-Plus Geographic Information System (GIS) software gives you the tools, maps, and demographic data you need to analyze and understand how geography affects you and your business. Every day you have to contend with spreadsheets and databases filled with vast amounts of customer, employee, sales, facility, and territory data.

With Lighting-Plus mapping software you can visualize data in new and different ways, unearth geographic patterns hidden in your data, and convey that information in a straightforward manner.
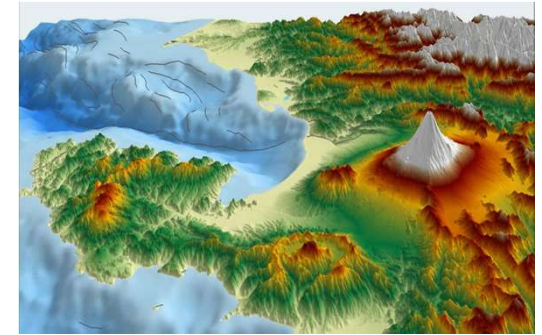

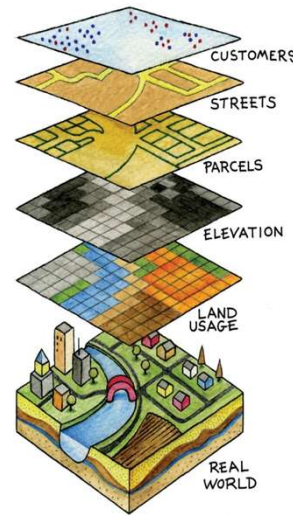

Lighting-Plus provides everything you need to realize the benefits of desktop mapping and spatial analysis with a single, easy-to-use package.

With Lighting-Plus you can:

• Know exactly where your customers are
• See where sales are highest
• Find hidden opportunities
• Spot geographic patterns and trends that cannot be seen in database tables and spreadsheets
• Answer geographic questions that impact your operations.

Lighting-Plus has the richest feature set and highest performance of any mapping software.

Lighting-Plus offers comprehensive desktop mapping software functionality and provides many new and enhanced features that make it easier for you to create and edit maps, add your data to maps, analyze geographic data, and connect to corporate data resources.

Radar & Military Grade Surveillance systems:

Radar & Military Grade Surveillance systems is the world's first affordable, high grade, fully coherent solid state radar sensor, which outperforms other sensor technologies, especially in bad weather and ground clutter conditions. Our solutions, provides a low maintenance and high reliability capability with many unique features such as low radiated power, waveform optimization and return filter processing.

Our technology is the primary tool for target and threat detection up to the horizon and in short range areas of operation, in adverse weather conditions such as rain and rough seas, as well as environments with strong ground clutter.

Our systems will provide and increase situational awareness at sea, onshore and on land to navies, armies, Special Forces, airports, civil infrastructure, ports, border agencies, and security services.

We brings to the user enhanced and small target detection, ensuring safety at sea, ports and shipping lanes (SOLAS & IALA compliant), situational awareness on the battlefield, in security and safety missions, and land and coastal border surveillance.

Unlike other sensing technologies, our radar provides enhanced threat detection and target discrimination through Doppler filter processing and unique algorithms and can provide target identification and tracking of specific target types, even in adverse weather (at sea or on land) and ground conditions.

Solar Power Systems:

Lighting-Plus has an experience in electrical, building and insulation technologies which have led us naturally into the renewable energy market.

In just two short years we have fast became one of the leading installers of renewable energies.

Solar Power system is determined to give you and future generations a cleaner and brighter future; this is why we always choose the best materials for your installation, with no compromise on quality.

We understand that the best available materials mean a greater return on your investment.

We are committed to revolutionizing the way in which the world produces and uses energy.

Enterprise Content Management Solution:

Enterprise Content Management Solution are core elements of the IT systems architecture of modern companies. They are increasingly becoming the central interface for all corporate processes.

The corporate website is the digital business card of global companies and corporations. As the centralized communications channel, it has a direct impact on a company's success.

With Enterprise Content Management Systems (CMS) you can intuitively and efficiently maintain your website.

And, users don't need programming experience to operate current Content Management Systems.

However, not every web CMS is appropriate for every company, as the different Content Management Systems vary significantly in their functions.

It is therefore advisable to define concrete requirements for your web CMS at a project's outset, as a wrong decision can severely limit your options later in the project.

ERP & CRM Solutions:

End-to-end services provide customers with a single point of contact and responsibility, which minimize costs while expediting projects and programs.
Enterprise Resource Planning suite that will revolutionize the way you do business.

We've leveraged cutting edge development and database tools to allow you to manage processes, automate your workflow and produce the results you need.

Graphic data presentation features provide point-and-click access to vital information, giving end-users the tools they need to analyze the data in a user-defined format for fact-based decision making.
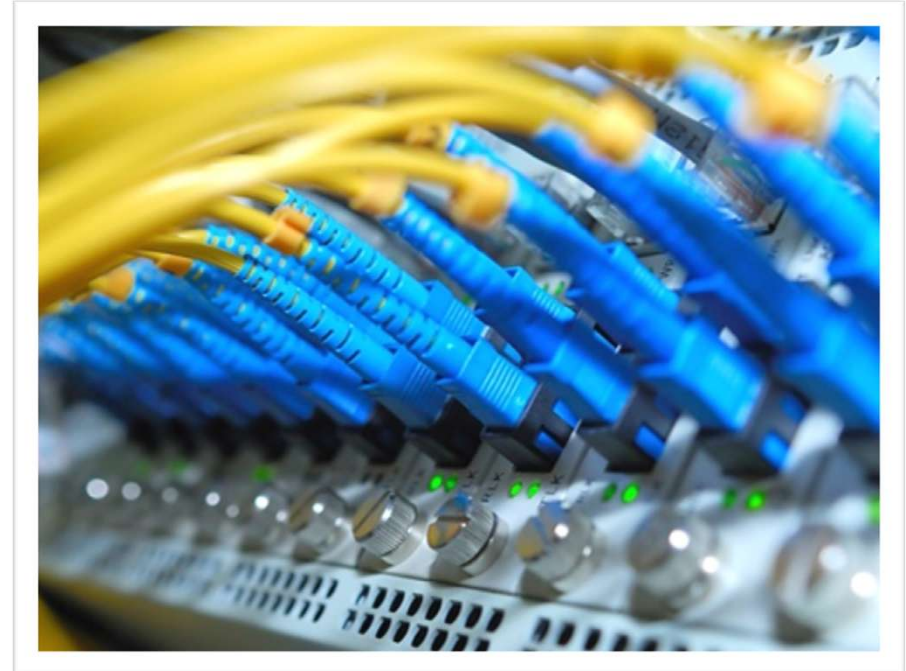

Network Security Solutions:

Defense-in-depth is an information assurance strategy in which multiple layers of defense are placed throughout the network and data centers.

The idea behind this approach is to defend the data center against any particular attack using several, varying methods.

The concept of security in layers is important from the perspective that no single system can tackle emergent cyber threats facing us today.

Therefore it's necessary to gain complete visibility and an ability to groom the traffic data at origin and filter out the types of data that are of no concern for cyber security.
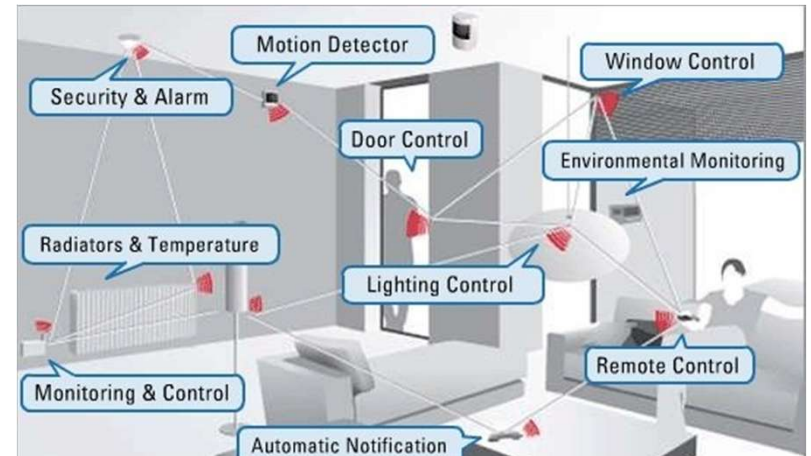

Building Management System (BMS):

When it comes to Building Management, Lighting-Plus knows that every building has its specific needs and that these needs change throughout the building's life cycle.

Lighting-Plus helps to integrate new and existing building systems-affordably.

Special customized solutions will simplify facility management, boost cost-efficiency and improve comfort, energy management, security and safety by taking full advantage of leading open system standards.

Structured Cabling System (Copper & Fiber Optic Cabling):

Lighting-Plus provide complete interconnectivity solutions designed and manufactured to meet the customized needs of our clients.

Our Cabling Solutions goes beyond the mere "hard wire" concept to combine as needed to offer total connectivity solutions that may include copper, fiber and software connectivity in combination.

We implement solutions precisely tailored to your business needs including LAN's and LAN extensions, intelligent Building Systems and campus-wide networks integrating facilities that may be miles apart.

Safety and Security CCTV & surveillance:

At Lighting-Plus, our primary focus is to protect what matters most to your company.

Lighting-Plus's integrated approach to products and services ensures we provide a total Electronic and physical security solution.
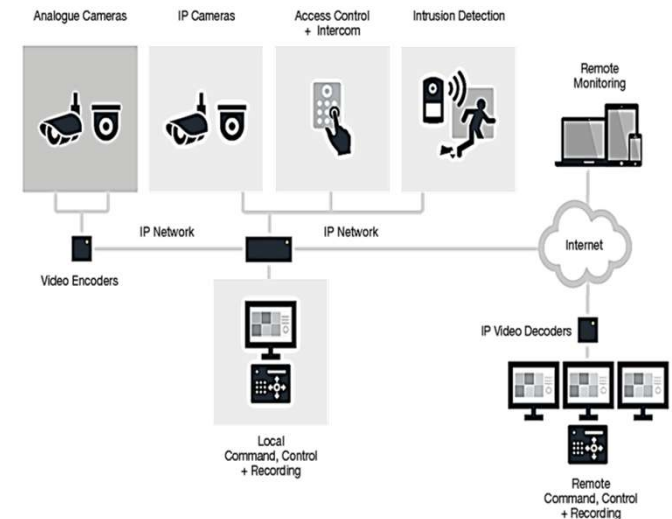

By tailoring the system to fit your individual needs, we will help you secure your business by taking care of the safety of your people and property, putting both your own and your customers' minds at ease.

Lighting-Plus CCTV systems provide an excellent deterrent against theft and vandalism.

Lighting-Plus closed circuit television systems protect your business with reliable 24 hour surveillance.

Our CCTV surveillance solutions can be used for recording the activity occurring both inside and outside your premises and are linked to hi-tech digital recording equipment.

We advise you on the placement of CCTV technology in line with our commitment to provide the very best security service to the commercial sector, we advise you on.

Video Surveillance CCTV:

The optimum combination of CCTV surveillance cameras, recording equipment and lighting to protect your business form theft, violence and vandalism.

• CCTV control equipment:

Lighting-Plus provides an extensive range of commercial CCTV control equipment tailored to the individual needs of your business.

From traditional analogue CCTV systems to the very latest digital CCTV surveillance equipment, Lighting-Plus can offer the perfect closed circuit television security system to meet your security needs.

• A wide range of CCTV cameras:

Whether your business requires internal or external CCTV cameras, Lighting-Plus has a range of IP cameras, Analogue cameras designed to perfectly integrate with your system.
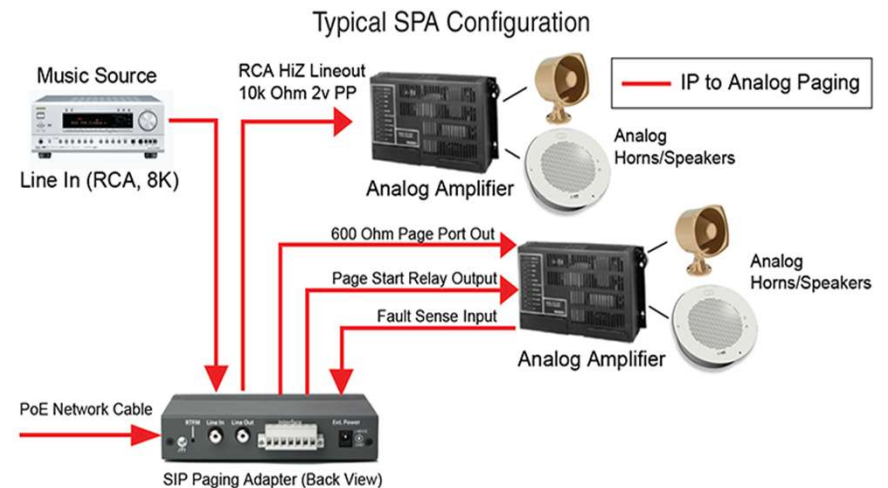

Public Address System:

An advanced system for general audio distribution over multiple subnets which makes extensive use of multicast, to address many stations at the same time, keeping traffic low.

AV technology solutions help designers create consumer electronics with truly exceptional video and enhanced sound quality.

By developing products that suppress background noise and enhance the audio quality of voice and music, combined with industry leading image capture and display technologies,

Typical SPA Configuration

Safety Firefighting, Voice Alarm Systems:

Fire Detection Alarm System
Protecting your own safety makes your life Easy
SAFE & SECURE

In firefighting system, the external firefighting system is to extinguish and suppress fires against external vessel. It is equipped with fire monitor, firefighting pump, electric motor, portable controller and fire monitor and so on.

Firefighting pump can be driven by transmission power from driven-engine or dedicated motor.

According to mounting location of fire monitor, there are sliding tower, folding tower and platform on wheel house.

Tower's characteristic is to be folded and stored in a low and compact size.
It would significant facilitate handling on fire suppression and extinguishing using dual monitor of foam liquid and dry powder.
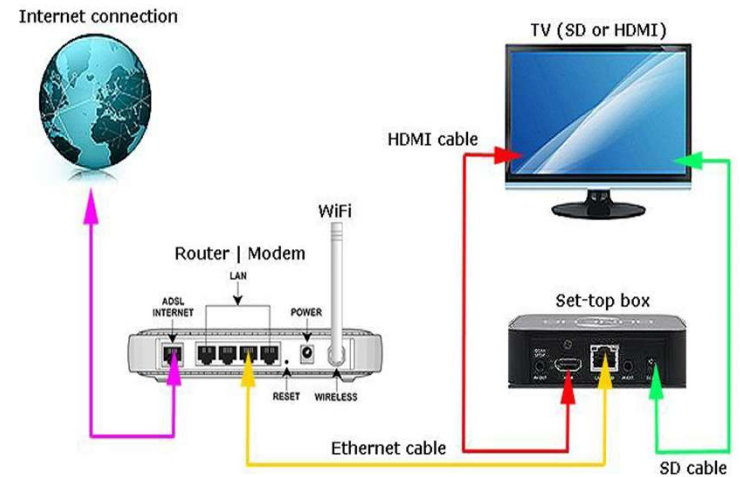

IPTV & Interactive TV Solutions:

Lighting-Plus can help you at all stages of your Building IPTV development:

- First-time Building IPTV specification or proposal
- Help promoting IPTV within an organization
- Understanding how to sell Building IPTV against analogue solutions
- Updating your IPTV knowledge CPDs to educate staff at your consulting/architecture firm
- Proposal Assistance

Lighting-Plus is eager to work with consultants and architects, whether independent or within organizations, to help them specify Building IPTV systems.

We can advise you on third-party integrations to ensure your proposal meets your customers' TV and video needs.
